DETAILED ACTION

Claim Rejections - 35 USC § 102(b)

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-32 are rejected under 35 U.S.C. 102(b) as anticipated by Brisley et al., "hereinafter Brisley", (US Pat. 6,413,483 B1).

Brisley discloses a catalytic converter for a lean-burn engine comprising: a supported layered catalyst having a first layer containing platinum, potassium, and a barium NO_x storage component carried on a washcoat comprising a mixture of at least two oxides selected from the group consisting of alumina, ceria and zirconia, and a second layer containing rhodium carried on a washcoat comprising ceria and zirconia, and said catalytic converter further comprises an interlayer, disposed between said first layer and second layer, containing a barium compound carried on a washcoat (see col. 4, claim 1). See also col. 4, claim 3.

With respect to the claimed catalyst properties, it is inherent and expected that the catalyst converter disclosed by Brisley would possess the same properties as being claimed since the catalyst is the same.
